

# AlphaRoll Riser

## Product Information Sheet

Select the height that is best for your event with an AlphaRoll dual- or quad-height riser

No other riser has as large a height range as the StageRight AlphaRoll. The revolutionary design of the AlphaRoll Riser allows you to easily adjust the height from 16" to 40" – saving you money because you no longer need to buy and store multiple units in different heights. With our custom height option, you can have any height adjustments within that same 16" – 40" range. Setup is safe and fast. Simply roll the Riser into place, select the height, and unfold. No tools, dollies or extra hands are needed.

## Features and Benefits

Get any height from 16" - 40" in a single, cost-effective riser in either 4' x 8' or 6' x 8' sizes.

One person can easily set it up. It's the easiest in the industry, saving time and labor costs.

Saves storage space because you don't need multiple risers in different heights.

Each riser can store up to three Leg Sets right in the unit.

Dual-height Standard Leg Sets include two heights in either 6" or 8" increments: in 8" increments, 16"-24," 24"-32," 32"-40"; in 6" increments, 18"-24," 24"-30" and 30"-36."

Quad-height Standard Leg Sets include a choice of four heights in either 6" or 8" increments: in 8" increments, 16"-24"-32"-40"; in 6" increments, 18"-24"-30"-36."

Custom Leg Sets allow you to satisfy any height requirements in your desired increments between 16"-40."

## Ordering Information

### AlphaRoll Fold & Roll Riser

Parts #	Description	Weight

107602	18"-24"-30"-36" Quad-height AlphaRoll Leg Set	35 lb.

## Technical Specifications

### Product Description

The product described herein, manufactured by StageRight Corporation, is a small stage unit that shall fold up easily and accommodate a wide variety of events. It shall be fast and easy to set up by one person, and be equipped with casters to provide safe and easy transport. The height of the stage shall be adjustable from 16" to 40" in specific increments of 6" or 8" or in custom height increments. AlphaRoll units may be placed together to form larger stage configurations.

### Warranty

A one-year limited warranty against defects in materials and workmanship shall be provided.

### Material/Physical Characteristics

- All steel tubing in the frame shall be 16 gauge or heavier. All steel components shall be finished with a baked-on black powder-coat finish.
- Each caster shall have non-marking polyurethane tread locked to a polyolefin core and be rated for 300-pound load.
- Each unit has a uniform load capacity of 125 pounds per square foot (PSF).
- Foot cap made on non-marring polypropylene. E. Lock that secures riser in transport position shall release by a Safety Cleat Lock.
- Angled slots shall be provided in the adjustment legs for the height locating pin. Angled slots provide more rigidity than round holes when weight is placed on unit.

### Material/physical characteristic differences

- AlphaRoll Value Fold & Roll
- Single-sided surfaces.
  - 3/8" removable pin locking system for height adjustment.
- AlphaRoll Elite Fold & Roll
- Reversible, two-sided surfaces.
  - Quick-release locking pin system for height adjustment.

### Accessories

Tilt & Tote Stairs, Budget Stairs, Velcro Skirting, Chairstops, Universal Guardrail. Fabrication: Shop Assembly. Unit shall be delivered fully assembled.

### Finishes

All steel components shall be finished with a baked-on black powder-coat finish.

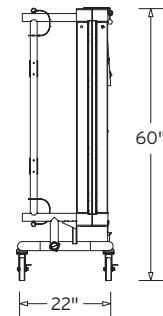

### Examination

It shall be the responsibility of the customer to conduct a site examination upon delivery to verify the product's condition.

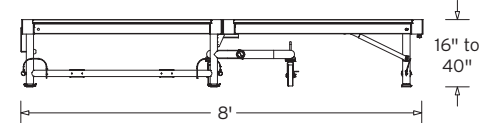

### Installation

Units shall be capable of on-site setup by one person, as described in instructions.
